myRARE® for EVKEEZA

Patient getting started guide

Not an actual patient or caregiver

INDICATION

EVKEEZA is an injectable prescription medicine used along with diet and exercise and other low-density lipoprotein-cholesterol (LDL-C) lowering medicines to lower LDL-C in adults and children 1 year of age and older with a type of high cholesterol called homozygous familial hypercholesterolemia (HoFH).

It is not known if EVKEEZA is safe and effective in children under 1 year of age.

IMPORTANT SAFETY INFORMATION

Do not use EVKEEZA if you are allergic to evinacumab-dgnb or to any of the ingredients in EVKEEZA.

Please see additional Important Safety Information throughout and accompanying full Prescribing Information, including Patient Information.

my RARE® for Evkeeza® (evinacumab-dgnb)

Evkeeza® (evinacumab-dgnb) Injection

myRARE® can help you navigate your treatment journey

Patrice
Patient Navigator

myRARE is the Patient Support Program that can help you access EVKEEZA® (evinacumab-dgnb) as prescribed by your healthcare provider and provide ongoing support.

After enrolling in myRARE, you will be teamed up with a **Patient Navigator** who can connect you with all of the myRARE support offerings. Your Patient Navigator can*:

- Help you understand your health insurance benefits
- Provide updates during the insurance approval process
- Let you know if you are eligible for financial support programs
- Assist with any logistical challenges (how and where to get treatment)
- Equip you with information and resources

100%
of patients

responding to a survey reported that their Patient Navigator†:

- Listens to their concerns and cares about what is important to them related to their EVKEEZA treatment
- Supports them to receive their EVKEEZA treatment

Once you have enrolled in myRARE, your Patient Navigator will call to welcome you to the program

You will receive a call from "myRARE Support" (1-833-469-7273)

*While your Patient Navigator is your contact for myRARE support, remember that your doctor is your go-to for information about your condition and treatment.

†EVKEEZA satisfaction survey data through 04/30/25, n=78, sourced from Regeneron CRM of EVKEEZA.

IMPORTANT SAFETY INFORMATION (cont'd)

Before receiving EVKEEZA, tell your healthcare provider about all of your medical conditions, including if you:

- are pregnant or plan to become pregnant. EVKEEZA may harm your unborn baby. Tell your healthcare provider if you become pregnant while using EVKEEZA. **People who are able to become pregnant:**
  - Your healthcare provider may do a pregnancy test before you start treatment with EVKEEZA.
  - You should use an effective method of birth control during treatment and for at least **5 months** after the last dose of EVKEEZA. Talk with your healthcare provider about birth control methods that you can use during this time.

Please see additional Important Safety Information throughout and accompanying full Prescribing Information, including Patient Information.

Getting started with EVKEEZA

Your myRARE® Patient Navigator can help your doctor confirm your insurance coverage for EVKEEZA. There is no cost for myRARE support, and it is not required for EVKEEZA treatment.

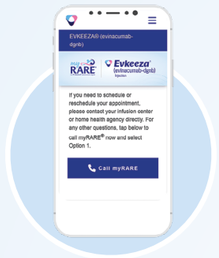
	Your doctor	myRARE/ Your Patient Navigator
Start	**Your doctor sends a completed myRARE for EVKEEZA Start Form**, including EVKEEZA prescription, to myRARE to review your coverage	**myRARE completes a benefits investigation** to determine if your insurance covers EVKEEZA and what supporting documentation may be required by your insurance company
Review	myRARE contacts your doctor to **review your benefits investigation outcome** (also called Summary of Benefits) **Your doctor will decide where you will receive your EVKEEZA infusion**. Options include your doctor's office, an infusion center, or your home	Your Patient Navigator will provide you with **regular status updates** on the progress of the review with your provider. They will also **review the Summary of Benefits with you** and answer any questions you may have about your coverage and cost for EVKEEZA
Prior authorization (PA)	**Many insurance companies will require a prior authorization** for infusion medications such as EVKEEZA If required by your insurance, your doctor **submits a request for a PA** to your insurance company	Your Patient Navigator will provide you with **updates on the request for a PA**
Appeal	**It is not uncommon for an insurance company to initially deny coverage for medications** for various reasons, including insufficient clinical documentation Your doctor may **submit an appeal** to your insurance company to reconsider the denial	If your doctor chooses to submit an appeal, **your Patient Navigator will provide you with updates on the status of the appeal** and may provide information on potential other sources of coverage

myRARE® for Evkeeza® (evinacumab-dgnb)

Evkeeza® (evinacumab-dgnb) Injection

myRARE® can provide helpful tools and resources

These offerings can help you manage your treatments and connect you with the myRARE community.



Informational text messages

Text messages are available for patients who opt in to receive them. Messages cover many topics, including:

- Onboarding and welcome
- Copay card updates
- Appointment reminders and confirmations
- Status updates

The EVKEEZA® Digital Companion app,* powered by Redi.Health

This free health management tool, for use on a mobile device or computer, provides tools to help you start and stay on track with your treatments. Features include:

- Educational resources
- Track your LDL-C results and how you are feeling
- Log your monthly infusions
- EVKEEZA patient articles and messages

The myRARE Newsletter

These quarterly newsletters can help keep you informed and inspired! They include:

- Information about events in the HoFH community
- Interviews with Patient Navigators and EVKEEZA Mentors and Ambassadors
- Delicious, heart-healthy recipes
- Articles on fun and relevant topics for the season

Informational emails

These emails provide information about your condition, resources to help you manage your treatments, and more.

- Talk to your Patient Navigator to sign up for email updates, delivered to your inbox

HoFH=homozygous familial hypercholesterolemia; LDL-C=low-density lipoprotein-cholesterol.

*Users must be 13 years of age or older to register for the EVKEEZA Digital Companion. The Redi.Health platform is intended for users over the age of 13 and Redi.Health does not knowingly collect personal information from children under the age of 13.

Take advantage of additional support programs available to you!

Ready to connect?

Call **1-844-990-8588** to schedule a call to speak with a mentor

Find support and guidance through the EVKEEZA Mentor Connect program

Through the EVKEEZA Mentor Connect program, you can **speak one-on-one with a trained mentor and hear their personal story**.† Share your own experiences and find support from someone who knows what living with HoFH is like as you navigate your own journey.

Caregivers can also connect with a mentor to ask questions about living with and caring for someone with HoFH.

†You must be 18 years of age or older to speak with a mentor.

HoFH Cholesterol Connections: free virtual educational webinars

The HoFH Cholesterol Connections program provides **free educational events** for people who may be interested in learning more about HoFH and EVKEEZA. You can participate in these (virtual) events on your computer or mobile device via the Zoom app.

You can meet others who share your experiences, hear the story of someone living with HoFH, learn about HoFH and EVKEEZA from an expert physician, and get your questions answered!

To find out about the latest events and to register, call **888-210-0085** or visit **hofhevents.com**

IMPORTANT SAFETY INFORMATION (cont'd)

Before receiving EVKEEZA, tell your healthcare provider about all of your medical conditions, including if you: (cont'd)

- are breastfeeding or plan to breastfeed. It is not known if EVKEEZA passes into your breast milk. You and your healthcare provider should decide if you will receive EVKEEZA or breastfeed.

Please see additional Important Safety Information throughout and accompanying full Prescribing Information, including Patient Information.

myRARE® for Evkeeza® (evinacumab-dgnb)

Evkeeza® (evinacumab-dgnb) Injection

EVKEEZA® (evinacumab-dgnb) infusion

Once coverage for EVKEEZA is confirmed, it's time to prepare for your treatment

These steps can help you understand what to expect throughout your treatment. Your doctor and myRARE® will keep you informed as next steps are coordinated. This is just a guide; it is important that you follow the instructions of your healthcare team.

1 Preparing for your infusion

- If you are receiving treatment at an infusion center, **confirm the date and time of your appointment** with the center and ask if you should arrive early to complete any paperwork
  - Check to see if the facility has special parking instructions
- **Bring a friend or family member** along if you would like support during your infusion, but ask ahead about the visitor policy
- You may want to **bring a book or a tablet** and earphones to listen to music or watch a movie
- **Dress comfortably in layers** (in case the temperature of the room varies) and be sure that what you wear allows the healthcare team to access your arm for the infusion

2 Before the infusion

The healthcare team may:

- Check your vital signs, including blood pressure, temperature, and heart rate
- Ask how you are feeling and other general questions about your health
- Perform other tests and assessments to prepare you for your infusion
- Get you settled in your infusion chair

3 During the infusion

Your EVKEEZA infusion will last for approximately 60 minutes. Here is how the process usually works:

- An infusion needle will be placed in your arm by a healthcare professional and connected to an infusion pump, and the infusion will begin
- Once the infusion starts, you may find that you have some time to yourself to read, listen to music, or watch a movie
- Expect to be monitored closely by a nurse throughout the infusion. Alert the infusion nurse immediately if you have any reactions, and the nurse can stop or slow down the infusion as needed

4 After the infusion

- You will **continue to be monitored** for side effects or infusion-related reactions for a period of time after your EVKEEZA infusion is completed
- **Call your healthcare provider** right away if you experience any reactions or unusual symptoms
- Follow the **post-infusion instructions** given to you by your healthcare team

Scan the code to see real patient stories about living with HoFH

IMPORTANT SAFETY INFORMATION (cont'd)

Tell your healthcare provider about all the medicines you take, including prescription and over-the-counter medicines, vitamins, and herbal supplements.

Please see additional Important Safety Information throughout and accompanying full Prescribing Information, including Patient Information.

Keep track of your monthly scheduled and completed EVKEEZA treatments
by using this table

While your healthcare provider is your trusted source of information for your EVKEEZA treatment, we know you may have logistical or other non-medical questions. **The myRARE® team is here to help.** Call **1-833-4my-RARE** (1-833-469-7273) **Option 1**, Monday–Friday, 9 AM–9 PM Eastern time

Keep track of your treatment appointments in 2026

Not an actual patient

EVKEEZA® (evinacumab-dgnb) is administered every 4 weeks, which means you'll receive 13 treatments per year

We understand that life can get busy, and it may be difficult to keep track of your treatment schedule. myRARE® can help.

Tear out the appointment table on the previous page.
Then, put it on your fridge, bulletin board, or somewhere it's easy to see.

Keep track of your scheduled and completed EVKEEZA treatments by marking the calendar.

Tips to help you manage your appointments:

(you can use any or all of these)

Confirm with your Patient Navigator
if your appointment took place or if you had to move it

Opt in and consent to receive text messages
Automated messages can be used to track and confirm your appointments

Log your treatments in the EVKEEZA Digital Companion app,
powered by Redi.Health

IMPORTANT SAFETY INFORMATION (cont'd)

EVKEEZA can cause serious side effects, including:

- **Allergic reactions (hypersensitivity), including a severe reaction known as anaphylaxis.** Tell your healthcare provider right away if you get any of the following symptoms: swelling (mainly of the lips, tongue or throat which makes it difficult to swallow or breathe), breathing problems or wheezing, feeling dizzy or fainting, rash, hives, and itching.

The most common side effects of EVKEEZA include symptoms of the common cold, flu-like symptoms, dizziness, runny nose, nausea, and feeling tired or weak.

Tell your healthcare provider if you have any side effect that bothers you or does not go away. These are not all the possible side effects of EVKEEZA. Call your doctor for medical advice about side effects. You may report side effects to FDA at 1-800-FDA-1088.

Please see additional Important Safety Information throughout and accompanying full Prescribing Information, including Patient Information.
